

DATA-LED PORTFOLIO ANALYSIS

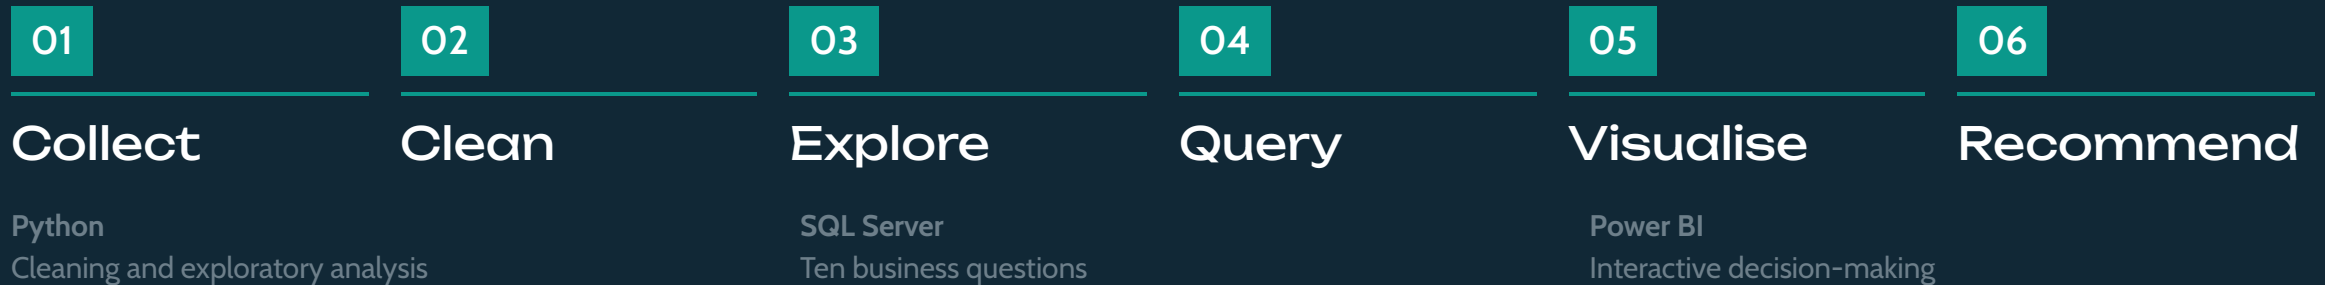

# Customer Shopping Behaviour Analysis

---

From 3,900 purchases to four actions for growth.

# 3,900 purchases become six business decisions

The workflow moves from evidence to action without turning the analysis into a code walkthrough.

# The dataset is broad enough to separate signal from noise

| Lens            | Evidence                                            |
|-----------------|-----------------------------------------------------|
| Scale           | 3,900 purchases<br>18 columns<br>50 US states       |
| Commercial core | \$233,081 total revenue<br>\$59.76 average purchase |
| Data quality    | 37 missing review ratings<br>No duplicate customers |

# The clearest growth gap is subscription adoption among women

0%

of 1,248 female customers are subscribed

## Customer mix

68% male  
32% female

## Subscription base

Only 27% subscribe  
All 1,053 subscribers  
are men

## Interpretation

A conversion  
opportunity—not a  
demographic  
conclusion.

# Clothing and Accessories carry the revenue engine

77%

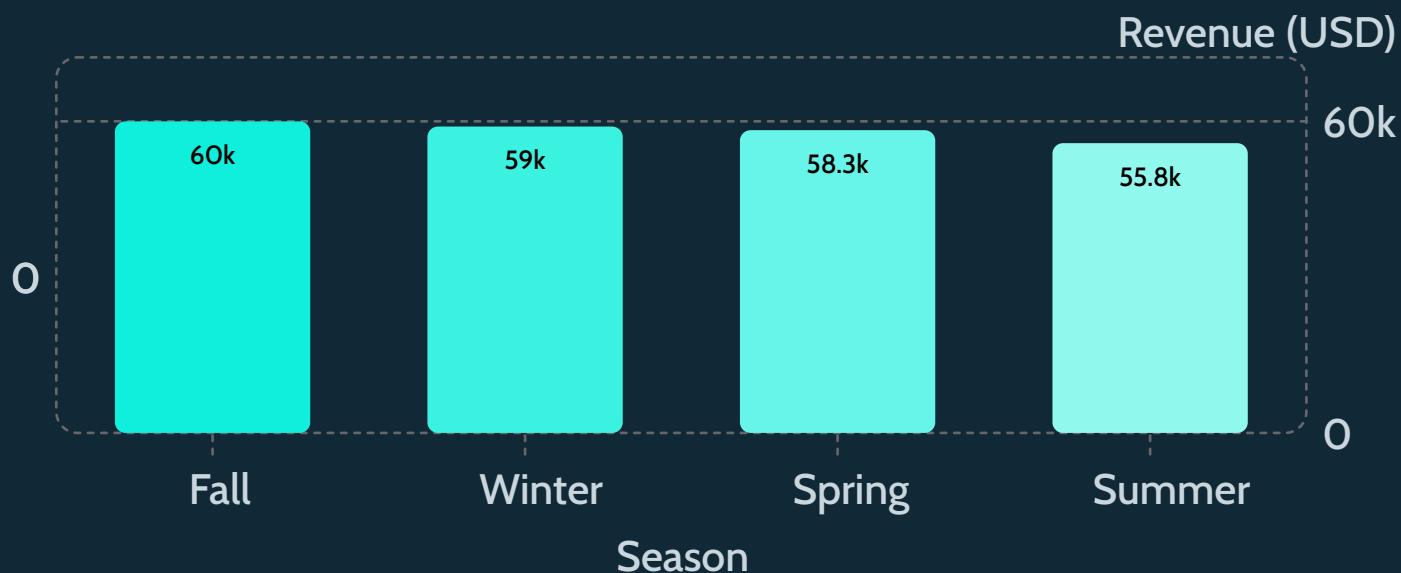

of revenue from Clothing + Accessories

Clothing: \$104.3K

Accessories: \$74.2K

Outerwear: \$18.5K, or 8% of revenue

# Most operational levers barely move basket size

## \$59.76

Average purchase

Discounted orders: \$59.28

Without discount: \$60.13

Express customers average about \$2 more per order than Standard customers.

Spend is spread evenly from \$20 to \$100. Fall leads at \$60.0K; Summer trails at \$55.8K, a gap of about 7%.

# The business retains well but attracts too few new customers

| Customer group | Evidence                                                          |
|----------------|-------------------------------------------------------------------|
| Loyal          | 3,116 customers; more than 10 previous purchases; 80% of the base |
| Returning      | 629 customers                                                     |
| New            | 155 customers; 4% of the base                                     |

## Outerwear

Jacket  
Coat

**Keep in stock**  
The strongest sellers

**Pair intelligently**  
High-rated items with hero products

**Test growth**  
Use Outerwear's smaller base as a focused growth test

# Power BI turns the analysis into a manager's operating view

## Interactive filters

Category, Location, Age Group and Payment Method update the visuals together.

## KPI cards

Revenue, average order value, rating, prior purchases, purchase days and customer count.

## Three pages

Customer Profile · Purchase Patterns · Product Preferences

# Four actions translate the analysis into growth

## Open subscriptions to women

Target Clothing and Accessories with real member benefits such as free Express shipping and early access.

## Convert loyal non-subscribers

Reach the 2,583 repeat buyers already showing trust.

## Replace blanket discounts

Test spend-more-save-more offers and reduce discount dependence on Hats, Coats and Sneakers.

## Fix the acquisition and Summer gaps

Use referral rewards, first-purchase offers and a Summer push around Sandals, Hats and Accessories.
